

# Tile Sq. Ft. Calculator

Below are Tips and on How to Calculate SQ. FT for your Tile Area:

**Step 1** Measure your desired Tile Area using measuring Tape in **Feet**:

Measure the Length in feet:

Measure the Width in feet:

**PLEASE NOTE:**  
 \* We recommend at least a minimum of 10% extra for cuts, possible damage or special design for your installation project, owever, you may add anywhere between 5% to 15% for extras. Please consult your installer for professional opinion.  
 \* You can calculate odd shape areas by using the same tile calculator guide here, simply measure and calculate the sq. ft for each section then add all the sq. ft together at the end!  
 \* For more help on how to measure, please contact KoreL Design Tiles.

**Step 2** Calculate Your SQ.FT:

<input type="text"/>	X	<input type="text"/>	equals	<input type="text"/>
Length in Feet	(multiply)	Width in Feet		Your sq. ft!

<input type="text"/>	X	1.10	equals	<input type="text"/>
Your sq. ft	(multiply)	Extra 10% for Cuts!		Tile sq. ft to Order!

**Step 1** Measure your desired Tile Area using measuring Tape in **Inches**:

Measure the Length in Inches:

Measure the Width in Inches:

**PLEASE NOTE:**  
 \* We recommend at least a minimum of 10% extra for cuts, possible damage or special design for your installation project, owever, you may add anywhere between 5% to 15% for extras. Please consult your installer for professional opinion.  
 \* You can calculate odd shape areas by using the same tile calculator guide here, simply measure and calculate the sq. ft for each section then add all the sq. ft together at the end!
